DETAILED ACTION

Request for Continued Examination

1. The request filed on July 21, 2003 for an RCE based on parent Application No. 09/341,379 is acceptable and an RCE has been established. An action on the RCE follows.

Specification

2. The disclosure is objected to because of the following informalities: the specification lacks section headings such as "Background of the Invention" and "Brief Description of the Drawings".

Appropriate correction is required.

Claim Rejections - 35 USC § 102

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

4. Claims 34, 36, 38-39, and 42 are rejected under 35 U.S.C. 102(b) as being anticipated by Edamula [Pat. No. 4,837,414].

Edamula teaches a control system for an oven comprising a memory with two sections for two sets of functions (Figure 2, #116 & 123), a control panel with buttons that produces signals to select and provide parameter values (column 2, line 38), a remote

Art Unit: 1761

controller that produces signals that select and provide pre-programmed functions and parameters separate from the functions and parameters of the control panel (Figure 2, #101; column 2, lines 41-45), appliance control means that respond to the remote controller by using programs and information stored in the memory (Figure 2, #121-122 & 124), transmitting and receiving means between the remote controller and the appliance control means (Figure 2, #113, 115, 121, 128), and display means for status information (Figure 2, #117). Phrases such as "wherein the status information includes..." are merely preferred methods of using the claimed apparatus. Edamula also teaches a method of operating a cooking device by activating buttons on a control panel to provide a first set of parameter values (column 2, line 38), providing data signals to a controller to select pre-programmed control functions separate from the functions of the buttons (column 2, lines 41-45), and operating the device by use of these signals and controls (column 4, lines 26-46).

Claim Rejections - 35 USC § 103

5. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

6. Claim 37 is rejected under 35 U.S.C. 103(a) as being unpatentable over Edamula as applied to claim 34 above, in view of Schwarzbacker et al [Pat. No. 5,710,409].

Art Unit: 1761

Edamula teaches the above mentioned components. Edamula teaches a clock in the appliance control means (column 5, line 28). Edamula does not teach a clock in the remote controller which updates the appliance clock. Schwarzbacker et al teach a cooking device comprising a remote control (Figure 1, #51) which includes a clock which updates the appliance (column 4, line 35). It would have been obvious to one of ordinary skill in the art to incorporate the second clock of Schwarzbacker et al into the invention of Edamula since both are directed to cooking devices, since Edamula already included a clock and remote controller which displayed the cooking time (Figures 5A-C), and since Schwarzbacker et al teach that the second clock can be used to adjust and modify the cooking time (column 4, line 38).

Response to Arguments

7. Applicant's arguments filed July 21, 2003 have been fully considered but they are not persuasive.

Applicant argues that Edamula does not teach a memory with two sections. However, Edamula clearly teaches a memory with two sections (Figure 2, #116 & 123).
